Plastic bottles
with the presence of glass.
Add an impression of volume
to your product!

PEP-30AZ
PEP-50AZ

The thick base imparts the premium style and presence that is usually only achieved with glass.

An impression of volume is added to the product, without the weight and fragility of glass, offering safety and peace of mind.

The series combines the advantages of plastic and glass, with a classic, cylindrical form that can be easily incorporated into existing product lineups.

Available accessories include droppers and pumps.

PEP-AZ series — Plastic bottles with a thick base and the presence of glass —

- Present a premium image like that of glass

These thick-walled plastic bottles have volume and present a premium image matching that of glass containers.

Base thickness: 9mm approx.

※ Base shape does not have fixed geometry, and variation in base height may occur.

- Lightweight and strong, offering safety and peace of mind

《Comparison to TAKEMOTO's glass bottles》

1/3 of the weight of glass bottles

	30ml	50ml
PPG Series (Glass)	54g	80g
PEP-AZ Series (Plastic)	17g	28g

- Standard neck with a classic design

The classic, cylindrical shape makes it easy to incorporate into existing product lineups. With a standard neck, there is a variety of compatible accessories, including screw caps, nozzle caps, pumps, and droppers.
