The popular long selling PH Series

We have made new variants of the popular PH Series by replacing 30% of the raw material with BIO-PE. PH Series bottles made with BIO-PE are now available on inventory and can be purchased by the carton.

These standard design bottles are suitable for a wide range of applications.

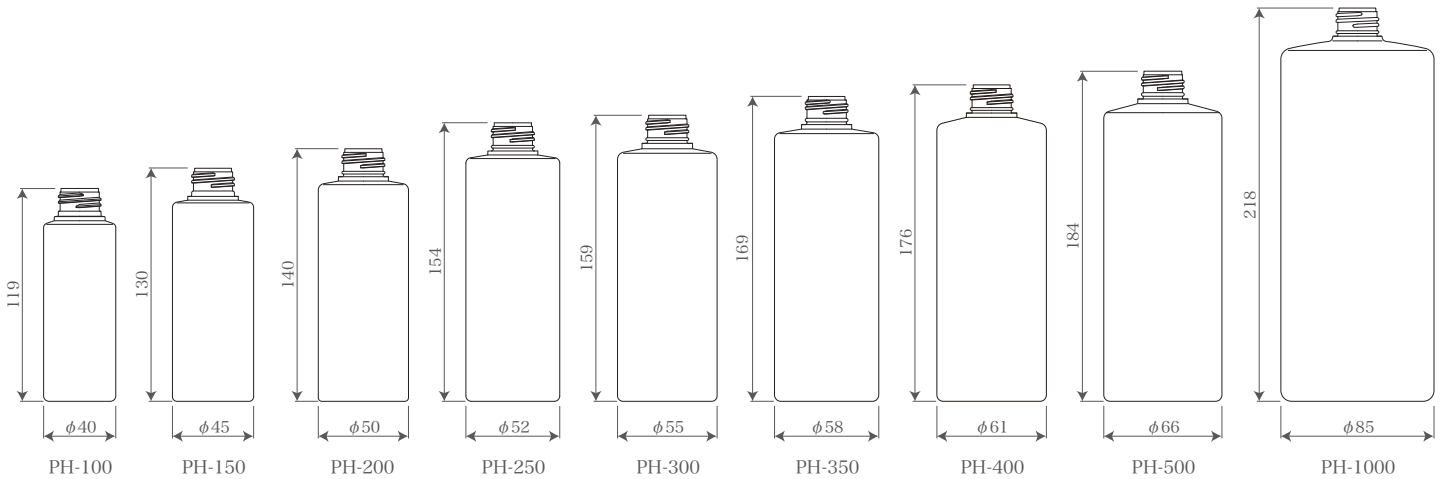

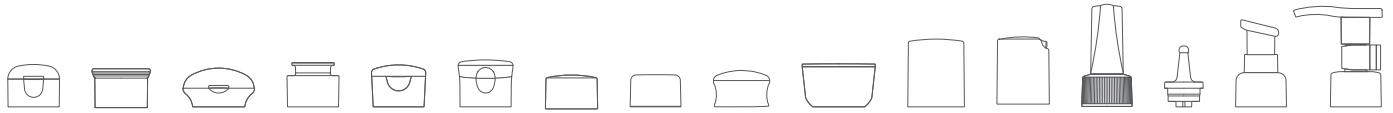

PH Series BIO-PE

BIO-PE products now available on inventory

P(24/410) Neck Accessories Not for use with G-Plugs

The PH Series is compatible with accessories in TAKEMOTO' s standard neck finish.
 (only a selection of the P (24/410) Accessories available are shown below)
 Choose from the range of options, including flip-top caps, screw caps, nozzle caps, plugs and dispensers to suit the formula and application.

Material: HDPE
Molding method: EBM

Color tone and usage characteristics vary from containers made with conventional PE bottles.
Please check samples to confirm.

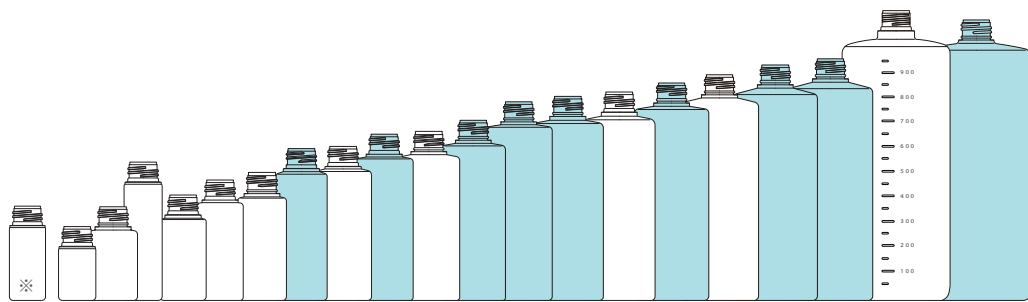

Containers made with plant-derived raw materials

These containers are made with biomass plastic in which molasses from plants (sugar cane, etc.) is used as a raw material so that ethylene used in the production of the resin is bio-based.

PH Series (P (24/410) Accessories)

Choose the capacity to suit the product concept.
In addition to P (24/410) Accessories, there are options with PPS (20/410), 33 φ Pump neck, 2cc Pump neck, and the slim A series.
