

# AOPF-450

**A bottle for foamer pumps**  
has been added to the AOM and  
AOMP bottle Series

It is an eco-friendly bottle that is made with plant-derived biomass PET. It has a stable shape that is easy to use even in wet areas. There is a mark at the 450mL filling line, which is useful when filling or refilling. There is also a wide range of other capacities with the same form, making it possible to develop a full lineup of products.

# AOPF-450

## Foamer pump PET bottle with good stability

### ■ Pump options

Two different pump designs are available. It is also possible to adjust the fineness of the foam. Please contact us for more details.

**AOPF-450**

Bottle material: Biomass PET / Molding method: ISB\*1

\*1 Molding method: "ISB" stands for "injection stretch blow"

**F5L  
Foamer Pump**  
Dose : 0.75cc

**F6L  
Foamer Pump**  
Dose : 0.75cc  
(Made-to-order product)

### ■ Decoration options

Different product images can be presented depending on the decoration method used, such as printing, labeling, and shrink film.

Shrink film application range

Shrink film and labeling application range

### ■ Filling line mark

There is a mark at the 450mL capacity line\*2, making it easy to set the right position. Please use it as reference when filling or refilling.

\*2 Calculation based on water

### TCS Takemoto Colour Selection

Compatible Component

A selection of a total of 26 colors, including 19 standard colors and 7 gentle nuanced colors is available for PET injection stretch blow molded products. This range of stock colors can shorten the development period from product planning to commercialization.

### Containers made with plant-derived raw materials

These containers are made with biomass plastic in which molasses from plants (sugar cane etc.) is used as a raw material so that the ethylene used in the production of the resin is bio-based.
