

AMBE Series

New rectangular bottle series
with a gentle, elegant form!

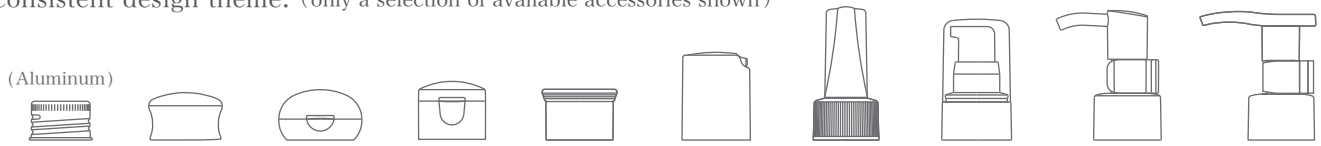

Pump (from the left) : PD-P1024B II Pump / PD-P1024EB II Pump
Bottles (from the left) : AMBE-300 / AMBE-500

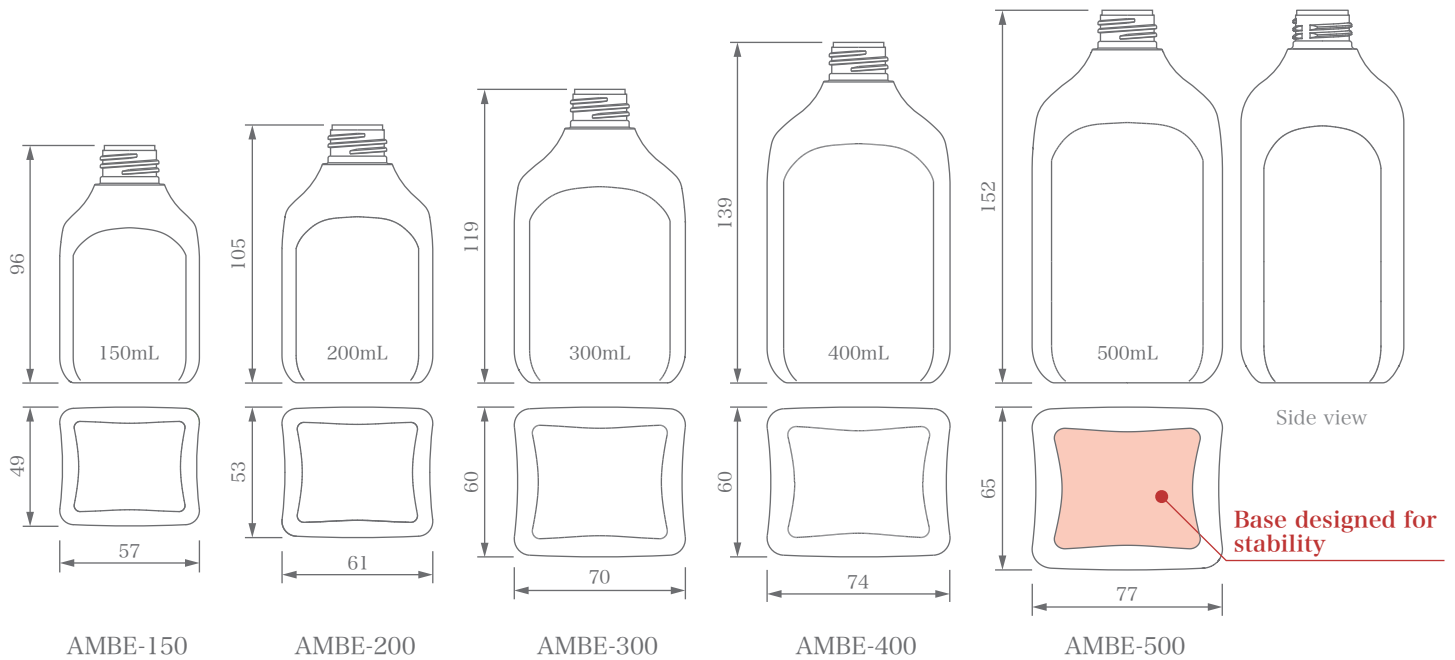

Introducing a new rectangular bottle series featuring gentle shoulder lines. The bottles are made with sustainable biomass PE material (30% ratio). Available in capacities ranging from 150mL to 500mL, the series is ideal for a wide range of application from skincare products to toiletries.

AMBE Series – New elegant rectangular bottle series –

With Takemoto's standard 24/410 (P) neck finish, the series is compatible with an array of screw, flip-top, nozzle and twist caps, as well as dispensers. This range makes it possible to develop a full line up of products with options to suit the formula and application with a consistent design theme. (only a selection of available accessories shown)

24/410 (P) Series accessories (not compatible with G-plugs)

Container material: HDPE (30% biomass PE) / Molding method: Extrusion blow molding

Containers made from plant-derived raw materials

These containers are made with biomass plastic in which the ethylene for resin production is derived from plants (molasses from sugar cane etc.).

■ Can be decorated on all 4 sides

Printing and labeling are possible on all four sides. There is a large space available for branding and the distinctive bottle design will make your product stand out. * Printing on the sides is possible with pad printing.

AMBE-500
