### ■ Notes on usage

- The heat resistance value of 90°C has been evaluated in-house by Takemoto.
- Heat resistant temperature and chemical resistance of the bottle may vary depending on the conditions of use.
- Please allow for expansion of contents due to heat when determining fill volume.
- Depending on the characteristics of the contents and the storage environment after filling, decompression of the bottle may occur.

### ■ Easy-to-hold

Panel design makes it easy to hold

### ■ Perfect for gifts

All three sizes of these lightweight PET bottles are the same height, making them ideal for use in gift packs.
